

AIGLON

Festuca trichophylla

- Sustainable low input with high persistency
- Excellent summer colour - good appearance under drought!
- Very good winter Fusarium tolerance
- High tolerance to red thread disease
- Suitable for lawn use and close mown areas

4salt

Save costs and protect the environment

AIGLON maintains good colour during both winter and summer allowing to limit input of fertilizer while preserving an attractive lawn appearance.

Disease tolerance

Tolerance to the common diseases - winter Fusarium and red thread - is at a very high level. This allows maintaining visual merit and to reduce the need for repair and disease control.

High density...for long time

AIGLON is a high density variety competing very well with weeds resulting in a very high persistency. Return on investment!

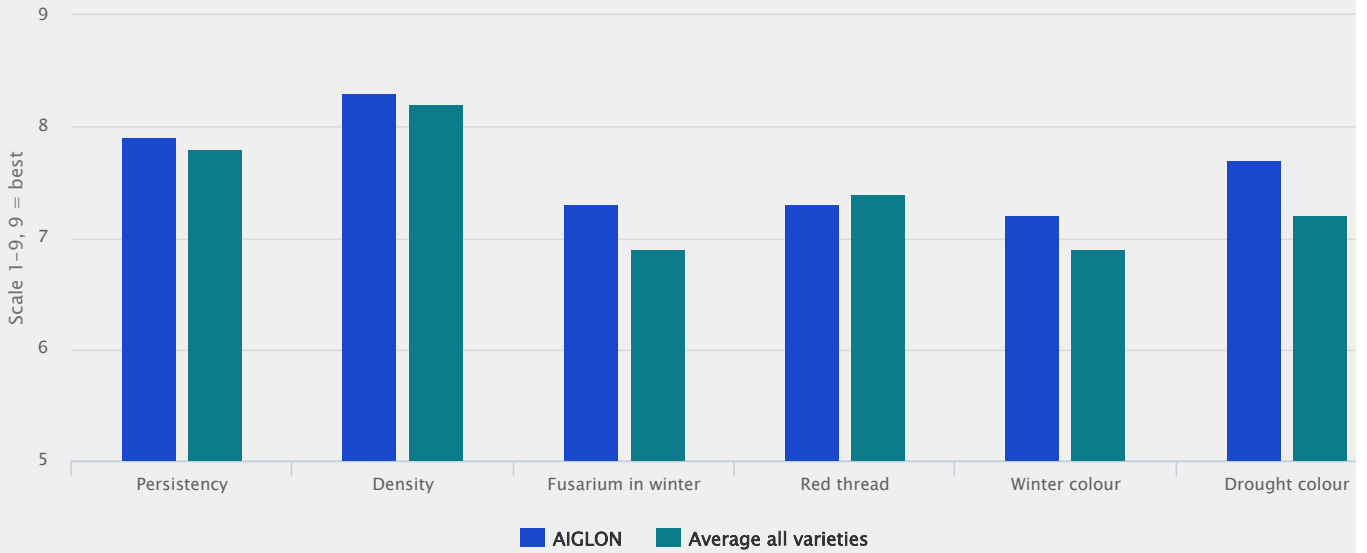

Technical Specifications

- Slender creeping red fescue
- Very dense disease tolerant variety maintaining colour during both winter and summer
- Listed/recommended in EU NL UK
