

BRAMMO

Festuca rubra rubra

- Intermediate density for better stress tolerance
- Medium green colour
- Resilience and self-repair with strong rhizomes
- Low input and disease tolerant

Around stress tolerant variety

Very stress tolerant variety due to an intermediate density, improving performance when conditions are difficult.

This makes BRAMMO an alternative or complement to our well-known MAXIMA 1.

Multipurpose

Red fescues are regaining interest due to their low needs of input. BRAMMO will fit in many homelawn mixtures and will add persistency to park lawns and extensive areas. The strong rhizomes adds extra resilience.

Technical Specifications

- Strong creeping red fescue
- Allround resilient variety with strong rhizomes
- Listed/recommended in EU SK
