

STORM

Lolium x boucheanum

- Very high yields in spring
- Intermediate heading, highest flexibility
- Grazing tolerant
- Excellent quality

Power to Perform

STORM combines early the spring growth and yield potential of Italian ryegrass with the quality, persistence and disease resistance of perennial ryegrass.

+ Lightning Growth

STORM offers exceptional yield in early spring and rapid regrowth after defoliation.

+ Thunderous Yields

STORM produces very high yields of quality forage that can be utilised for either grazing or silage. STORM is heading intermediate and offers great adaptability in mixture recipes.

= Floods of Grass

STORM is an essential ingredient in leys required to provide exceptionally high yields of quality forage especially under dual-purpose regimes.

Technical Specifications

- Hybrid ryegrass
- Power to Perform
- Listed/recommended in EU
BA BY DK LIT RU SE
- Lateness: Intermediate

Storm's benefit

Source: Official trials UK. Relative yields.

	Storm	Rosalin	Aubisque	Fetione	* Storm's benefit
Heading date	May 28	May 21	May 24	May 31	=
First cut (67D) yield	110	90	95	103	7%
Grazing yield	104	98	104	103	=
Early spring growth	114	105	102	92	9%
Conservation yield	111	104	104	105	6%
